

Battery Care Guide

Thank you for purchasing a Makita premium LXT product. To prolong the life of your batteries and give you maximum satisfaction, please follow these simple guidelines:

- **Never allow your battery to go completely dead**
- **When your tool begins to slow or labour, remove the battery from the tool and charge it completely**
- **Never recharge a fully charged battery**
- **Allow a hot battery to cool before charging**
- **Avoid storing your batteries in a case or bag that contains metal objects that may come in contact with the battery terminals**
- **Charge your batteries once every six months if they are not used often**
- **All new batteries need to be charged before use**

When QUALITY & SERVICE Counts - Choose Makita
